

CATALOG KX-TGF320

The new KX-TGF320 Corded/Cordless Phone features a 3.4-inch (8.6 cm) large white illuminated display with tilt function.

A dedicated call block button enables you easily register to the call block list.

During an electric power failure, the power stored in batteries can be supplied to the base unit. This allows you to make a call with handset even when the power is out. When a new message is recorded on the answering machine, the base unit can alert you with a sound. When you are away, it can send an alert by a call to a preregistered mobile phone or office phone.
