

Cordless Phones KX-TG4772

Features

Talking call display*1*2*3

Use this feature to hear who is calling. Using text to speech technology, the caller's name is announced between rings.

*1 Requires subscription to call display, call waiting and/or voice mail service. Please check with your local telephone company for details and availability in your area.

*2 Name pronunciation may vary.

*3 Requires name and number registration in phonebook function.

Voice Mail Service Compatible

If you subscribe to your phone company's voice mail service, an indicator on the LCD will flash when there are new messages in your mailbox.

Intercom mode

Two handsets can communicate without the base unit interface inside or outside the home. This mode doesn't interfere with incoming calls.

50-Station Phone Directory

Up to 50 names and telephone numbers can be stored. The stored numbers can be quickly accessed using the navigator key.

All Digital Answering System

A microchip handles all messages. The operation is virtually silent and recorded messages are easily accessed. You can control the system not only by pressing the base unit's buttons but from the handset as well.

Call block*¹

Use this feature to block unwanted calls. Store the caller ID information of all unwanted callers in your block list to eliminate future pesky calls. Unwanted callers will receive a busy signal.

*¹ Requires number registration in the call block list.

Call Display & Call Waiting Deluxe*¹ Compatible

The LCD readout can display the name and number of incoming callers, even if you're on another call.

*¹ Requires subscription to call display, call waiting and/or voice mail service. Please check with your local telephone company for details and availability in your area.

Chain dial

This feature allows you to dial phone numbers in the handset phonebook while you are on a call. This feature can be used, for example, to dial a calling card access number or bank account PIN that you have stored in the handset phonebook, without having to dial manually.

DECT 6.0 technology (1.9 GHz)

DECT 6.0 technology (Digital enhanced cordless telecommunications) is a new frequency band for cordless phones (1.9 GHz). DECT models are interference-free from other wireless devices

such as computer routers, wireless keyboards, microwave ovens, and other common household devices.

DECT is a proven and reliable technology that has been used in Europe for many years. It offers brilliant sound quality, prevents eavesdropping, has long range transmission and select Panasonic models have an amazing 17 hours of talk time!

- Wireless network friendly
(Interference-free from Wi-Fi networks, microwave ovens, etc.)
- Prevents eavesdropping
- Clear sound & Long range transmission

PLUS technology

The unique signal processing technology from Panasonic provides even better quality and longer range than conventional DECT 6.0 handsets, thanks to an 80x increase in signal correction resolution.

Digital Duplex Speakerphone

Helps reduce the echo and drop out effect found in regular speakerphones for a more natural-sounding conversation.

Directory Sharing

Part or all of the registered telephone directory on one handset can be transferred to other handsets.

Equalizer (customized sound system)

This feature clarifies the voice of the person you are talking to, producing a more natural-sounding voice that is easier to hear and understand. You can change your favorite sound range (high, off, low) and have individual handset settings.

Handset Locator (Paging)

To locate a misplaced handset, simply touch the "Locator" button on the base unit and the handset will beep, making it easier to find.

Headset (Optional)

Select cordless phone models are equipped with headset jacks. Buy an optional headset (Panasonic models: KX-TCA400K, KX-TCA430S) to enjoy hands-free conversations.

Intelligent ECO mode

Power consumption is automatically reduced when the handset is close to the base unit for extended talk time. Battery life on Talk is up to 13 hours when in ECO mode.

Night mode

Night mode allows you to select a span of time during which the handset will not ring for outside calls. This feature is useful for when you do not want to be disturbed, for example, while sleeping or during the night when the baby is sleeping. Night mode can be set for each handset.

Privacy Mode

With the Privacy Mode ON, you can prevent anyone else from joining or listening in on your conversation with an incoming caller.

Ringer ID*1*2

If you subscribe to Call display service, the illuminating colour (red, green, amber) and/or the ringer tone can be set to change according to the caller. The indicator on the handset lights up to

tell you that there is an incoming call or voice message.

*1 Requires subscription to call display, call waiting and/or voice mail service. Please check with your local telephone company for details and availability in your area.

*2 Requires name registration in phonebook function.
